Methodology & Assumptions

- Sources: free public RSS feeds (Google News, Reuters, ET, Mint, Business Standard, CNBC, Financial Express, Yahoo Finance).
- Relevance: rule-based keyword scoring (FMCG company + deal-action co-occurrence).
- Credibility: static publisher-tier table — a proxy for editorial track record, not a fact-check of the specific claim.
- Deduplication: exact URL/title match, then similarity scoring on cleaned article text.
